

VCHILL

Getting Started

- 1) Visit the Java VChill website at <http://chill.colostate.edu/java/>
- 2) Click on “Launch VChill” (you will see Java start up ^{*†})
- 3) Enter signon name

(password dialog pops up)

- 4) Enter password

(welcome message pops up)

- 5) Close welcome message

- 6) Select Z from Plot menu

- 7) Click on the Bookmarks tab

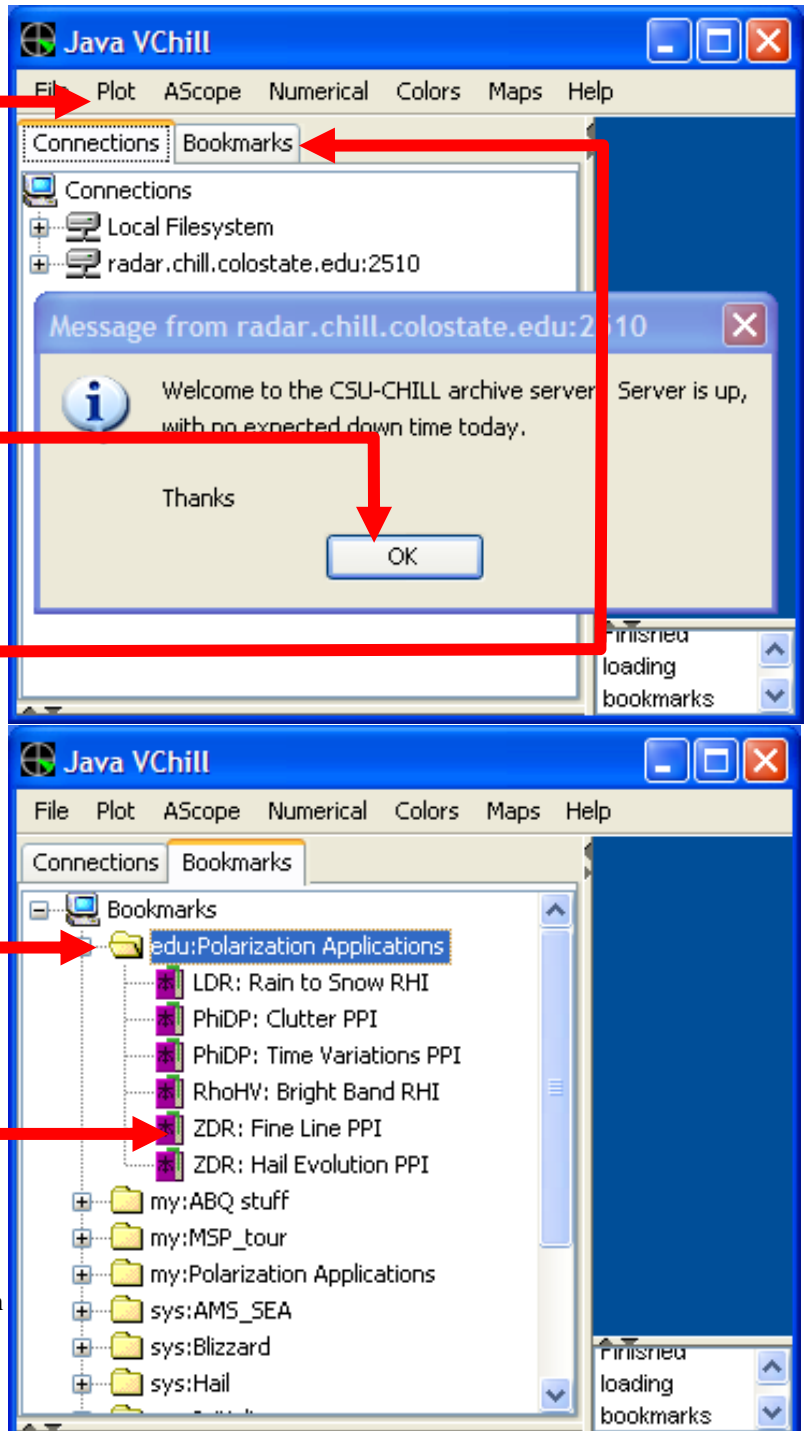

(Second screen appears)

- 8) Open the edu bookmarks

folder

- 9) Click on desired bookmark

case

* If it does not, you may need to install Java first. Click on the Download Center link (in the third paragraph on the VChill website) and download the appropriate version for your operating system (Windows, Linux, etc).

† If you get a security warning asking whether you want to trust the signed application distributed by “Jochen Deyke”, press the Always button.

Exploring archived data

- 1) Click back over to the Connections tab next to Bookmarks (if you have already viewed a bookmark, a sweep will be selected)
- 2) Expand directories and files to reveal more sweeps by double-clicking on their names or single-clicking the + next to them
- 3) Click on one of the other sweeps to see additional data
